<sup>(</sup>a) As part of the redesign of Labour Force Survey sample, a number of changes have been made to Labour Force Statistical Regions. These changes may result in a break in series for some regions. See Information Paper: Regional Labour Force Statistics (6262.0). (b) For definitions, and information about scope and standard errors of these estimates, see the latest issue of the monthly publication Labour Force, Australia (6203.0). (c) Estimates for South Eastern SR are not published separately. Data for the South Eastern SR are included in the ACT & South Eastern SR and in the Illawarra & South Eastern SR.

<sup>(</sup>a) Data from February 2000 onwards are not strictly comparable with earlier data. For details on the changes refer to the Forthcoming Changes in the November 1999 issue of Labour Force, Australia (ABS Cat.no. 6203.0). r Revised

## **NOTES**

#### INTRODUCTION

1 This report contains selected final labour force estimates derived from the Labour Force Survey component of the Monthly Population Survey. More detailed estimates will be published in *Labour Force*, *Australia* (cat. no. 6203.0), due for release at the end of the month.

## REGIONAL ESTIMATES

- 2 This report contains original (unadjusted) estimates of employed persons and unemployed persons for Labour Force Statistical Regions. Historically, these series have shown a high degree of variability which is inherent in data from the Labour Force Survey relating to small labour markets. Care should therefore be taken in the interpretation of regional estimates, particularly in month to month movements.
- 3 The Labour Force Survey is designed primarily to produce reliable National and State estimates. While estimates for regions are components of corresponding estimates at the State level, independent population benchmarks are not applied at the Statistical Region level. Therefore, while Statistical Region estimates will add to the State total, they will show less stability than for similar estimates at the State level. In addition estimates (particularly estimates of unemployment), being considerably lower than State estimates, are subject to higher relative standard errors.
- **4** Regional boundaries are regularly changed to adhere to the boundaries defined in the Australian Standard Geographical Classification (ASGC). These changes are made every 5 years, with the most recent changes being effective from September 1997. Further details about changes to dissemination regions can be found in *Information Paper: Regional Labour Force Statistics* (cat. no. 6262.0).

#### **INDUSTRY**

**5** From August 1994, Labour Force Survey industry data are classified according to the Australian and New Zealand Standard Industrial Classification (ANZSIC), a detailed description of which appears in *Australian and New Zealand Standard Industrial Classification 1993* (cat. no. 1292.0). ANZSIC classifies businesses according to their economic activities in a structure consisting of 4 levels (Division, Subdivision, Group and Class). Labour Force Survey data are coded to the Group level.

## STANDARD ERRORS

- **6** Standard errors of the estimates in this report for the States, Territories and Australia can be determined by using the methods described in the Technical Notes in *Labour Force, Australia* (cat. no. 6203.0). Statistical Region standard errors are available upon request from Mark Webb on Canberra 02 6252 5283.
- 7 Very small estimates are subject to high standard errors (relative to the size of the estimate) which can detract seriously from their value for most general uses. Where estimates and percentages have relative standard errors greater than 25%, they have been identified by an asterisk (e.g. \*1.0) to indicate that they are subject to high standard errors and should be used with caution.

#### **SYMBOLS**

- \* subject to sampling variability too high for most practical uses.
- r revised. For trend estimates, the most recent estimates are provisional and subject to revision.

### FURTHER INFORMATION

**8** For further explanatory information about statistics in this report, please refer to the Explanatory Notes and Technical Notes from *Labour Force*, *Australia* (cat. no. 6203.0).
